

<IGBT Modules>

CM400ST-24S1

HIGH POWER SWITCHING USE
INSULATED TYPE

fourpack (BRIDGE & AC SWITCH)

Collector current I_C 4 0 0 A
 Collector-emitter voltage V_{CES}
 BRIDGE 1 2 0 0 V
 AC SWITCH 6 5 0 V
 Maximum junction temperature T_{vjmax} 1 7 5 °C

- Flat base Type
- Copper base plate
- Tin plating pin terminals
- RoHS Directive compliant*
- Recognized under UL1557, File E323585

APPLICATION

3level inverter, UPS, PV

OUTLINE DRAWING & INTERNAL CONNECTION

Tolerance otherwise specified

| Division of Dimension | Tolerance |
|-----------------------|-----------|
| 0.5 to 3 | ±0.2 |

| | | Terminal to base plate | 16.7 | - | - | |
| e _c | Flatness of base plate | On the centerline X, Y (Note8) | -50 | - | +100 | μm |

*: This product is This product is compliant with the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS) directive 2011/65/EU.

Note1. Represent ratings and characteristics of the anti-parallel, emitter-collector free wheeling diode (FWD).

- Junction temperature (T_{vj}) should not increase beyond T_{vjmax} rating.
- Pulse width and repetition rate should be such that the device junction temperature (T_{vj}) dose not exceed T_{vjmax} rating.
- Case temperature (T_C) and heat sink temperature (T_s) are defined on the each surface (mounting side) of base plate and heat sink just under the chips. Refer to the figure of chip location.
- Pulse width and repetition rate should be such as to cause negligible temperature rise.

$$6. B_{(25/50)} = \ln\left(\frac{R_{25}}{R_{50}}\right) \left(\frac{1}{T_{25}} - \frac{1}{T_{50}}\right)$$

R₂₅: resistance at absolute temperature T₂₅ [K]; T₂₅=25 [°C]+273.15=298.15 [K]

R₅₀: resistance at absolute temperature T₅₀ [K]; T₅₀=50 [°C]+273.15=323.15 [K]

- Typical value is measured by using thermally conductive grease of λ=0.9 W/(m·K).

CM400ST-24S1

HIGH POWER SWITCHING USE
INSULATED TYPE

Note8. The base plate (mounting side) flatness measurement points (X, Y) are as follows of the next figure.

9. Use the following screws when mounting the printed circuit board (PCB) on the standoffs.
The length of the screw depends on thickness (t1.0~t1.6) of the PCB.

| Type | Size | Tightening torque | Recommended tightening method |
|----------------------|--------------------|-------------------|--|
| (1) PT® | K25×8 | 0.55 ± 0.055 N·m | by handwork (equivalent to 30 r/min by mechanical screw driver) |
| (2) PT® | K25×10 | 0.75 ± 0.075 N·m | |
| (3) DELTA PT® | 25×8 | 0.55 ± 0.055 N·m | ~ 600 r/min (by mechanical screw driver) |
| (4) DELTA PT® | 25×10 | 0.75 ± 0.075 N·m | |
| (5) B1 tapping screw | φ2.6×10 or φ2.6×12 | 0.75 ± 0.075 N·m | |

AC SWITCH PART

HALF-BRIDGE
SWITCHING CHARACTERISTICS
(TYPICAL)
 $V_{CE}=300\text{ V}$, $V_{GE}=\pm 15\text{ V}$, $R_G=1.6\ \Omega$ ($Tr1/Tr4$),
INDUCTIVE LOAD, PER PULSE
——: $T_{vj}=150\text{ }^\circ\text{C}$, - - - -: $T_{vj}=125\text{ }^\circ\text{C}$

HALF-BRIDGE
SWITCHING CHARACTERISTICS
(TYPICAL)
 $V_{CE}=300\text{ V}$, $V_{GE}=\pm 15\text{ V}$, $I_E=400\text{ A}$,
INDUCTIVE LOAD, PER PULSE
——: $T_{vj}=150\text{ }^\circ\text{C}$, - - - -: $T_{vj}=125\text{ }^\circ\text{C}$

FREE WHEELING DIODE
REVERSE RECOVERY CHARACTERISTICS
(TYPICAL)

$V_{CE}=300\text{ V}$, $V_{GE}=\pm 15\text{ V}$, $R_G=1.6\ \Omega$ ($Tr1/Tr4$), INDUCTIVE LOAD
——: $T_{vj}=150\text{ }^\circ\text{C}$, - - - -: $T_{vj}=125\text{ }^\circ\text{C}$

CM400ST-24S1

HIGH POWER SWITCHING USE
INSULATED TYPE

Keep safety first in your circuit designs!

Mitsubishi Electric Corporation puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of non-flammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

- These materials are intended as a reference to assist our customers in the selection of the Mitsubishi semiconductor product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Mitsubishi Electric Corporation or a third party.
- Mitsubishi Electric Corporation assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
- All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Mitsubishi Electric Corporation without notice due to product improvements or other reasons. It is therefore recommended that customers contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for the latest product information before purchasing a product listed herein.
The information described here may contain technical inaccuracies or typographical errors. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors.
Please also pay attention to information published by Mitsubishi Electric Corporation by various means, including the Mitsubishi Semiconductor home page (www.MitsubishiElectric.com/semiconductors/).
- When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.
- Mitsubishi Electric Corporation semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- The prior written approval of Mitsubishi Electric Corporation is necessary to reprint or reproduce in whole or in part these materials.
- If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination.
Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.
- Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for further details on these materials or the products contained therein.
